*** Within the fields of anthropology, psychology or sociology)

**** Not within the fields of anthropology, psychology or sociology)

\# Freshman Seminar - FS100 course is required. Students with 12 or more college credits may be exempt. Consult with your advisor for more information. Freshman Seminar should be completed during the first semester.

ONLN: All online
OLCR: Online with pre-determined number of on-campus meetings
HYBR: Blend of online and classroom instruction

Online Course: Online courses incorporate various technological components. All online courses contain the essential resources such as course outline, syllabus, reading and written assignments, quizzes and/or test including any additional resources deemed necessary to assist learners with the subject matter. Online courses are accompanied by a textbook or e-book, and interactive learning activities. A learner will interact with faculty and other students through discussion boards, blogs, journals, email, group collaborative assignments, through the use of a computer or any other supported internet-connected device. These courses are identified in the course schedule with the ONLN coding.

Online with Campus Requirement: Some outline courses may require a student to come to the campus to complete an exam. These courses are identified with the **OCLR** coding.

Hybrid Courses: Hybrid courses combine online and face-to-face instruction. The coursework is online using Blackboard. These courses are identified in the course schedule with the **HYBR** coding.

Students who perform well in online classes are often:
- Technologically savvy and flexible, and able to quickly adapt to new technologies.
- Self-motivated and independent, while able to work effectively in groups.
- Aware that online learning requires a knack for time management and that the flexibility of online   learning does not equate to "easier" learning.
- Good communicators and able to communicate well in writing.
